SUMMARY

Backend-focused Computer Science student experienced in building scalable applications using Python(Django), Node.js, Next.js, and PostgreSQL. Strong foundation in REST API design, database systems, and clean architecture principles.

EXPERIENCE

Software Developer

StartxLabs

- Contributed to CRM system development for telecom client
- Developed and deployed multinational company landing pages
- Maintained and debugged production systems.
- Refined user interface components by integrating responsive design principles, enhancing usability and consistency across desktop and mobile platforms.

UI/UX developer

RDXDelta

November 2023 - February 2026

- Redesigned user interface components using responsive frameworks, ensuring consistency and accessibility across multiple devices and platforms.
- Streamlined design handoff by integrating interactive prototypes into the development workflow, enabling smoother collaboration between design and engineering teams.
- Implemented usability testing protocols and analyzed user feedback, driving measurable improvements in product satisfaction and workflow efficiency for end-users.

Backend Developer Intern

Zemnay Tech

July 2024 - September 2025

- Built backend APIs using Next.js and PostgreSQL
- Designed relational schemas and optimized queries
- Integrated Google AdSense for revenue generation
- Collaborated with frontend team for API integration
- Facilitated seamless data exchange by troubleshooting integration issues and refining endpoints to ensure efficient communication between backend services and the frontend application.

EDUCATION

Bachelor of Computer Science

Minor in Math • St. Mary's University • Addis Ababa • 2026 • 3.6

- shapes problem-solvers through practical and innovative computer science education.

UI/UX Industrial Basics and General Application

RDX delta • 2025

- Designed consistent, user-centered interfaces using Figma and Sketch for wireframing and prototyping.
- Contributed across the full UI/UX lifecycle, reducing manual testing time by 30%.

SKILLS

Tools:

Git, Linux, Docker (basic), REST APIs, Vercel

Frameworks:

Django, Node.js, Next.js, React, Express, Laravel

Databases:

PostgreSQL, MongoDB, SQLite

Languages

English, Amharic
